THE LIBIS GARDENS

Specializing in Bulbs for "Better Glads"

The GLADIOLUS

Every garden should have a planting of this flower of easy culture.

Our *gladiolus* stock consists of healthy, vigorous bulbs of select varieties.

Each year varieties are eliminated which seem the least interesting to visitors, and are no longer worth while; each year some of the better, newer sorts are added. Thus the desirability of varieties is constantly subject to popular approval, and is constantly attaining a higher excellence.

Our stocks are inspected by the Ohio State Department of Agriculture. We hold a certificate of nursery inspection issued by that Department.

All bulbs offered for sale are treated to assure freedom from possible thrips infestation.

Sizes—*Large* bulbs are $1\frac{1}{4}$ inches or more in diameter; *Medium* bulbs are $\frac{3}{4}$ to $1\frac{1}{4}$ inches; and *Small* bulbs are from $\frac{3}{8}$ to $\frac{3}{4}$ inches.

TERMS OF SALE

Gladiolus orders are usually shipped during March and April, governed somewhat by weather conditions; Dahlias, Cannas and Lily bulbs, during April and May. Perennial purchases are usually completed at the gardens, throughout the season.

Bulb orders of \$2.00 or over are delivered prepaid; orders of less than \$2.00 should include 15c for postage.

All goods are guaranteed to reach you in good condition, and to be true to label. Anything found otherwise, we hold ourselves in readiness to correct, to the extent of the price paid. You would not expect us to be responsible for stock after delivery in good condition to the customer; therefore, if through error or otherwise there is cause for complaint, promptness in reporting it will be appreciated.

All stock is subject to prior sale.

NOTICE! OHIO CUSTOMERS ONLY

SALES TAX—Add 3% to cover tax on goods delivered in Ohio. Stock for resale or commercial planting must be covered by resale certificate on goods delivered in Ohio. We will furnish this certificate on application.

We are mindful of the generous patronage of the past season, of both old and new customers, which was double that of any recent year, and say "Thank you" to every one. We are mindful, too, of the confidence and good will implied, and strive to merit its continuance.

It is not our intention to quote prices as low as the lowest in the country, but rather to offer the best in bulbs, roots, and plants. This requires care in every stage of growth and development, usually two years for plants and three years for bulbs. Not only care in the field to produce vigorous bulbs and plants, but close attention to storage of bulbs and roots during the winter months. Improper storage destroys vitality. We strive to the end that these bulbs and plants shall thrive, and give flowers and beauty for the customer beyond their expectations.

Prices should be consistent with quality from whatever point of view considered, and the best usually is the cheapest.

To those, then, who are looking for good quality rather than "run of mine" in bulbs, roots and plants, we submit the following pages.

Remittance should accompany your order, unless other arrangements are made. Make your remittance payable to

CERASTIUM - Tomentosum (Snow in Summer)	Silver foliage, white bloom.	25c

CHRYSANTHEMUMS - Hardy Garden Varieties

The hardy chrysanthemum is finding more favor each year with those who want an uninterrupted line of flowers, for its various varieties bloom from early September till late November, enduring light frosts and snows.

THE NEWER HARDY GARDEN VARIETIES

Aladdin Terra Cotta, coppery bronze, or pinkish orange bronze, blooming continuously from August on.	25c
Champagne Extra vigorous, free blooming, deep ruby red; reverse of petals a lighter contrasting color.	25c
Crimson Splendor Early, single, three to four inch, rich dark crimson blooms, yellow center; 2½ feet.	25c
Enchantress Pure deep pink, semi double large flower.	20c
Granny Scovill Full and fluffy flowers, four inches across; clear coral bronze. Early October. Height two feet.	25c
Murillo A pure deep rose pink, with dense clusters of blooms on long stems; a vigorous variety; 2½ feet.	25c
Peggy Ann Hoover An odd flower with long narrow petals, might be called cactus flowered; orchid or lilac pink; 2½ feet. Cut flowers extra long lasting.	25c
Pink Cushion Sometimes called "The Azalea Mum". Very early, blooming in Sept. and continuing in bloom throughout the season; eighteen inches tall, by 24 inches wide, a veritable cushion of flowers; Buds of rose, the blooms vary from deep rose to blush pink, in good sprays for cutting.	20c
Ruth Cummings Rich reddish bronze or terra cotta, semi-double, 2½ inch bloom. 3 ft. tall with excellent stems for cutting; very good.	25c
Tasvia Pure white flowers, completely covering the plant. Early blooming in late September. 2 feet.	25c
Vivid Extra vigorous, early October. Single. 3½ inches, shaggy flowers, American Beauty Rose color. 3 feet.	25c

STANDARD HARDY GARDEN VARIETIES

ALICE HOWEL	A rich shade of orange yellow, single blossoms; medium height and mid season.
ARGENTEUILLAIS	Scarlet bronze flowers tipped with gold, 2½ inches; late October.
BRONZE BUTTON	A button type, very free blooming, dark bronze colored flowers.
BRUNE POITEVINE	Reddish bronze, the reverse of petals golden. October.
BOSTON	Bronze orange flowers on tall stems; blooms 2½ in., Early November.
BABY MARGUERITE	Clear light yellow button; very good tall stems; Early November.
CARRIE	Shaggy flowers in clusters of clear light yellow. Very early.
CORA PECK BUHL	Golden yellow pompom, with tinge of bronze in center; mid season.
CAPTAIN COOK	Early rose pink pompom, tall strong grower. Extra, for cutting.
EXCELSIOR	Excellent bloomer or brilliant yellow on tall strong stems. Early November.
FERN RIDGE	Tall bright red, single like daisy. Early November.
FIREBIRD	Very bright red pompom of strong growth. November.
GLORY OF SEVEN OAKS	Not tall but an early bloomer of golden yellow. Popular.

NOTE: Everything planted in the perennial garden should be mulched the first winter after planting, and some things, such as lily bulbs, every winter.
NOTE: Prices of perennials are subject to change. Clumps dug with a ball of soil in mid-season or fall, as chrysanthemums for example, should cost more than the small plant in the springtime.

MRS. H. HARRISON	Pompom, excellent profuse bloomer of dainty blush pink. Early.
MRS. FRANCES H. BERGEN	Large pale pink flowers with deep pink centers. Flowers 3½ inches. One of the finest and most vigorous.
MRS. PHILLIPS	Single daisy like pink flowers, yellow centers. 3 in. blooms.
MITZI	Free flowering. Button type, blossoms open bronze changing to yellow.
OURAY	A strong growing pompom of medium size flowers, a very attractive bronze.
OLD FASHIONED YELLOW	Tall growing pure golden yellow, attractive shaggy blooms.
OLD FASHIONED ROSE	One of the most reliable and hardest mums, shaggy, large, semi-single blooms of American beauty rose color. Extra good cut variety.
PINK DOTY	Clear deep pink. Early November.
PETITE LOUISE	Pale pink, large shaggy flowers, early, free blooming.
WHITE DOTY	Tall growing pure white pompom. The clusters of white flowers are borne on long, strong stems, making an excellent cut flower variety.
WHITE BUTTON	A tall growing profuse bloomer of white, button type blooms.

PRICE: Plants each 15c; except where noted.

THE LIBIS GARDENS - Akron, Ohio

THE NEW KOREAN CHRYSANTHEMUMS

This new class of Chrysanthemums is considered hardier, and makes a surprisingly strong growth. Their exuberant early October blooming of bright pastel shades of single flowers, compels marked attention in the garden. The individual blooms are somewhat suggestive of the gerbera; and the sprays of blooms are useful as cut flowers.

Apollo Said to be a sparkling combination of bronze, red and gold and suffused salmon; we prefer to call it a rich terra cotta. Three feet tall, blooms 2 inches across, one of the best for cut flowers. 35c

Ceres Old gold blended with chamois-yellow. This variety gives decided contrast in color to the others. Three feet, blooms 2 inches. 35c

Daphne Daphne-pink; blooms 3 inches; height 2½ feet. 35c

Diana Blooms of this variety have more petals, making a fuller flower; the color is rose pink, suffused salmon. 2½ feet. 35c

Mars The most brilliant in the garden, a velvety wine-red, and the strongest grower, blooms 2 inches, height of bush 2½ to 3 feet. 35c

Mercury Coppery bronze red. 2½ inch flowers; height 2½ feet. 35c

Vulcan Glowing bronze - crimson. 50c

COREOPSIS

Pure yellow flower; 1½ to 3 feet. 25c

DAISY

Hartje and Elder May flowering. 25c

Shasta Large white daisies with long stems, fine for cutting. 25c

DELPHINIUM

Stately and beautiful in the garden, no perennial lends itself more advantageously for vases and baskets than the delphinium, - one might say the English Hybrid Delphinium. These range in color from pale blue to deep, dark blue, including various shades of rose, lilac or lavender.

Delphiniums will bloom two or more times during the season if flower stalks are removed promptly so that the seeds will not mature.

Our stocks of Delphinium consist mostly of the Wrexham, and the Blackmore and Langdon English strains. Plant in spring or fall.

Wrexham Strong 2 years plants. 35c to 50c and up.

Blackmore & Langdon Strong 1 year plants.
25c - 35c.

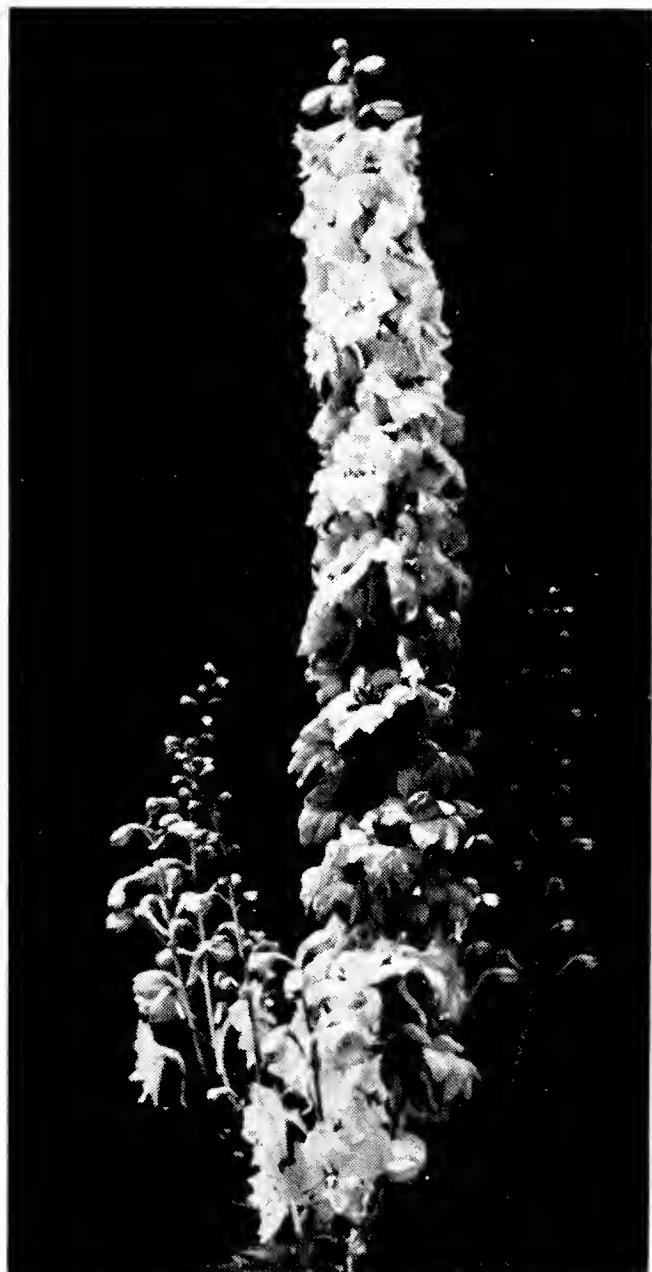

Seedlings - 10c - 15c.

Seed of the above 35c per 1-8 oz.

Delphinium Belladonna Light blue, 2 year plants 35c

Delphinium Bellamora Dark blue, 2 year plants 35c

Delphinium Chinense A dwarf, variety growing from 18 to 30 inches, with fern-like foliage; the color varies from medium light to dark blue; free blooming and useful for rock gardens or the perennial border. each 25c

DICENTRA or Bleeding Heart

Eximia Dwarf growing variety with lacy foliage and pink flowers. Blooms all season. 25c - 35c

Spectabilis The old-fashioned bleeding heart grown everywhere. 35c - 50c

THE LIBIS GARDENS - Akron, Ohio

DORONICUM

Bright yellow daisy-like flowers blooming in May and June. Tall growing. Excellent and long lasting as a cut flower. 35c

ENGLISH IVY

Plants potted, compact, well branched, 24 inches. 60c

EUONYMUS - Evergreen Bittersweet

Kewensis Very small dark green foliage valuable as a rock garden plant. 35c

Radicans Trailing, compact growing narrow-leaved evergreen vine; for covering rocky banks or rough walls. 2 to 2½ ft. 75c

Radicans Vegetus Strong growing variety with round glossy leaves. Fine evergreen covering for buildings or wall. 2 to 3 ft. \$1.00

EUPATORIUM - Hardy Ageratum

Purplish blue flowers similar to the ageratum, blooming late in the fall, 2 to 2½ feet; valuable for cutting. 25c

FERN (Ostrich)

Native, tall, 2½ to 3½ feet. 35c

GAILLARDIA

The "Gypsies" of the garden. Tawny shades of orange, yellow, and red. Blooms freely throughout the season. Young plants - 15c; Large clumps - 35c.

GEUM

In three colors; rich double yellow, double red, and single orange. 25c

GRASSES - Hardy Oriental Plume

Erianthus Ravennae - Pampas Grows 10 feet tall with fine silvery plumes. 50c

Eulalia - Japan Rush Very narrow green foliage. 4 to 6 feet. 25c

Eulalia - Variegated Japan Rush Long narrow leaves striped with white. An abundance of silver-gray plumes. 4 to 6 feet. 25c

Eulalia Zebrina - Zebra Grass The long graceful foliage of this variety marked with creamy bands across the leaf; grows 6 to 10 ft. with fine silver plumes late in the season. 35c

GYPSOPHILA

Bristol Fairy Produces large sprays of double white flowers of large size and blooms continuously throughout the season. This variety comes in grafted plants only.... 35c

HEUCHERA - Coral Bell

Various shades of pink and red. 25c

IRIS

The German Iris rank prominently among the more important flowers, and during their blooming season hold full sway as a cut flower, as well as in the garden.

The best time to plant German Iris is in July, but planting may be done all through the summer and early fall.

GERMAN IRIS

Ambassadeur Smoky velvety purple, 48 inches.

Juanita Tall-growing clear blue.

Aristocrat Violet-blue veined with white.

Lent A. Williamson Rich royal purple, very tall.

Brandywine Silvery blue.

Lord of June Lavender-blue.

Cavalier Deep shade of violet blue.

Mme. Chareau White with edging of lavender.

Clematis Light, clear, violet with variable veining at the base.

Mme. Gaudichau Very dark velvety-purple.

Commodore Tall-growing, deep violet-blue.

Opera Deep velvety-purple.

Darias Yellow and maroon variegated.

Queen Caterina Silvery pale lavender.

Dream Standard light pink.

Quaker Lady Smoky lavender with shades of yellow, blue and old gold.

Fulva Yellow.

Taffeta Smoky blue, old gold and bronze.

Georgia Soft shade of rose; early.

White Knight Pure white.

Gold Imperial True deep yellow.

PRICE: Strong divisions of each of the above varieties. Each..... 20c

DWARF IRIS

The dwarf iris commence blooming very early in the season, about April 10 and last for about 2 months. They usually grow from 6 to 12 inches. They are useful particularly for rock gardens and as low-growing borders.

Atro-Violacea Deep violet purple. 25c

Excelsa Pure yellow. 35c

The Bride Blush white. 35c

THE LIBIS GARDENS - Akron, Ohio

JAPANESE IRIS

The Japanese Iris bloom in June and July, after other Irises are through. For beauty of color and pattern, size of flower and plant, they are excelled by none.

Plant in the fall. Besides the list below we have an equal number from which to select during their blooming season.

Fascination Double lilac pink, lightly veined white.

Gakka-No-Nami Glistening creamy white; earliest, and very free bloomer.

Iso-No-Nami Suffused rose and blue over white, a large double; late.

Kumo-No-Obi Very full double flower deep rose-lavender.

Matchless Large double flowers, heavily veined blue on white, yellow center.

Queen of the Blues Double deep blue veined white, gold center.

Shadow Reddish-purple, single.

Purple and Gold Double rich violet-purple, with gold throat.

Each of the above - per clump 35c

LATHYRUS - Hardy Sweet Pea

Trailing vine, pink blossoms all summer. Good cut flower. 25c

LIATRIS

Pyconostachya or Kansas Gay Feather 4 to 5 feet. Rosy-purple spikes. 25c

Scariosa Dark purple in color. 3 to 4 feet. 25c

LINUM - Perennial Flax

Pale blue flowers on a spreading clump of slender, graceful stems. 25c

LILIES

HEMEROCALLIS or Day Lilies

These perfectly hardy, fragrant lilies have come to the forefront for the perennial gardens. Recent developments in hybridizing have produced varieties greatly improved in vigor, size and attractiveness of bloom, and in clear colors of lemon, gold and orange; with blooming seasons of the various varieties running throughout June, July and August.

NEW VARIETIES OF HEMEROCALLIS

J. A. Crawford Vigorous in growth; clear gold in color, an abundance of bloom with a unique and artful twirl of the petals. Commences to bloom in early July and continues in bloom for five weeks; 3 feet. Clump - 75c

The Gem Apricot yellow, with blooming season commencing about July 1st. 3 feet. Clump - 75c

Mrs. A. H. Austin Clear, deep orange, with broad and ruffled petals making a full, cup-shaped bloom; 3 ft. Clump - \$1.00

Golden Dream Clear, deep orange, very vigorous; blooms late in July and August; 3 feet. Clump - 75c

Lemonia Clear lemon color, tall; blooming period starts July 12th. Extra good bloomer. 3½ to 4 feet. Clump - 75c

THE OLDER VARIETIES OF HEMEROCALLIS

Dr. Regal Late May and early June, pure orange yellow; 1½ feet. Clump - 25c

Flava The old-fashioned favorite, "The Lemon Lily", planted in nearly every garden. 3 feet. Flowers in June. Clump - 25c

Fulva Reddish yellow, "The Tawny Lily", 3 - 4 feet. July. Clump - 25c

Funkia (Lancifolia) An abundant growth of foliage with lavender flowers in July and August. Excellent to plant in shady places. Clump - 35c

MADONNA - (*Candidum*)

The old-fashioned white trumpet lily, planted in nearly all old gardens; 3 to 4 feet. Large bulbs - 35c

PHILIPPINENSE FORMOSANUM

This is a late lily, usually blooming in September and October. Long trumpet shaped flowers, white, with green cast, and maroon shading on exterior; 3½ feet. Should be mulched in winter. Large bulbs - 25c

THE LIBIS GARDENS - Akron, Ohio

THE REGAL LILY

The Regal Lily is one of the most reliable of the hardy varieties and may be planted with confidence for a garden of lilies.

The trumpet shaped flowers are white, with a canary yellow throat; the reverse of the petals is tinted with pink or a rich maroon red in varying degrees of color.

The Regal Lily produces an abundance of pleasing fragrance, both in or out of doors; altogether the most outstanding hardy lily.

It is a profuse bloomer when well established, commonly with eight to twelve flowers on a stem, sometimes twenty-four or more. The height of the lily is from three to five feet. Its blooming season begins in late June or early July.

All in all, we wish to emphasize the hardiness, the reliability of blooming and the exquisite beauty of the Regal Lily, a truly Regal flower.

PRICES

Bulbs 4 to 6 inches.....	each \$.15
Bulbs 4 to 6 inches.....	doz. 1.00
Bulbs 6 to 9 inches.....	each .25
Bulbs 6 to 9 inches.....	doz. 2.50

NOTE: Regal Lilies may be planted in late Fall or early Spring. Bulbs for Spring planting are dug and delivered as early as weather conditions permit, usually in April; for fall planting in October. Bulbs quoted above are all blooming size. They should be planted five or six inches deep, and in clay soils it may be well to surround the bulb with sand.

THE LIBIS GARDENS - Akron, Ohio

PEONIES

Peonies improve in size and beauty of bloom and increase in the number of flowers produced for a number of years; in fact, they are among the most enduring of all hardy flower plantings.

We recommend planting in October and early November.

Orders for roots may be given during the blooming season, when satisfactory selections can be made.

Augustin d'Hour	Deep rich, dark red, silvery reflex.	.50
Belle Mauve	Deep pink	.50

PHLOX DECUSSATA

HARDY GARDEN VARIETIES

The hardy phlox embrace many varieties with a wide range of colors. In the list below we offer the ones which seem best and sturdiest, and representative in color.

NEW VARIETIES

Caroline Vandenburg	Pure, deep, lavender-blue. Large florets; tall, strong growing.	35c
Columbia (Plant Patent No. 118)	The pink phlox supreme. The robust growth of plant, clearness of bloom, long lasting flowers, and the long season of blooming, make this the outstanding hardy phlox. The flower is a cameo pink, with a light blue center. Prolific in the number of flower heads.....	One, 50c; three, \$1.25; twelve, \$4.50
Daily Sketch	A variety from England. Large florets, clear salmon pink with crimson center.	.45
Leo Schlageter	Early pyramidal blooms of scarlet. A very excellent, vigorous, brilliant red; height 3 feet.	30c
Mrs. Van Buennen	Showy, bright, deep salmon pink; large florets. Large trusses of flowers on robust plants of medium height.	30c
Saladin	Brilliant scarlet, with darker red center. The bright color of this variety is outstanding and always draws attention in the garden. Tall in growth, with plenteous bloom.	30c

STANDARD VARIETIES

AFRICA	A glowing red with a shade of purple; tall growing.	25c
B. COMPTE	Rich, satiny amaranth red, or purplish red; tall growing, one of the latest to bloom.	20c
COUNT ZEPPELIN	White flowers, with a clear red center.	25c
ETHEL PRICHARD	A strong growing variety of lavender flowers.	25c
ENCHANTRESS	True salmon pink, with darker center; tall, and a profuse bloomer.	20c
JULES SANDEAU	Free and long season bloom-	

ing of lilac-pink; moderate growth.	25c	
LORD RALEIGH	A dark lilac; free flowering and tall.	25c
MISS LINGARD	Earliest white, with slight suffusion of pink.	25c
MRS. JENKINS	The standard pure white; free flowering; 2½ feet.	20c
MRS. MILLY VAN HOBOKEN	Bright pink with suffusion of lilac; large florets; tall.	25c
THOR	A deep salmon pink, of good growth and long blooming season; a standard sort known to be good.	25c

THE LIBIS GARDENS - Akron, Ohio

PHLOX SUBULATA (Moss or Mountain Pinks)

Extensively used for rock gardens, borders, and for ground coverings. In April and May the moss-like foliage is hidden under masses of bloom. The various colors and varieties are indicated below.

Alba	Pure white creeping phlox.	20c
Atropurpurea	(New) red with darker center.	25c
Blue Hill	(New) light blue	25c
Rosea	Bright rose pink.	20c
Vivid	True pink	25c

POPPIES

ORIENTAL POPPY (*Papaver Orientale*)

For brilliance of color nothing exceeds the Oriental poppies during their period of blooming in May, June and early July. They increase in size and effectiveness for several years, with strong slender flower stems growing from $2\frac{1}{2}$ to $3\frac{1}{2}$ feet. If planted in August or September or early in the spring before there is much new growth, there need be no fear about their growing.

Orientale ("The Oriental Poppy")	Large cup-shaped flowers of scarlet with purple-black blotches at base of petals.	25c
Beauty of Livermore	Large flowers of dark crimson with black blotch; produces fine flowers freely.	35c
Lulu A. Neeley	Brilliant ox-blood red; a true, pure unfading, dark red, and the largest blooms of all, borne on long, strong stems.	50c
Mrs. Perry	Generally accepted as the best pink poppy.	35c
Perry's White	White flowers with a maroon blotch at base of petals.	35c

PRIMULA - Primrose

An excellent strain of hybrids of white, and shades of cream and yellow; large florets and large clusters of flowers, on robust plants.

..... 35c

PYRETHRUM or Painted Daisy

Single Hybrids	In shades of pink and red.	25c
Single White	Persian Pyrethrum powder plant, fine for cutting.	25c
Double White	Blooms freely and is fine for cut flowers.	35c

RANUNCULUS - Double Buttercup

Low Spreading type. 25c

SANTOLINA INCANA - Lavender Cotton

Dwarf compact growing plant with silver-gray foliage, useful in the rock garden or as a border plant.

..... 25c

Statice Latifolia Sea Lavender misty flowers on tall stems above a plant of dark green leathery leaves. A dainty filler.

..... 2 year plants - 25c

SEDUM - Stonecrop

The Sedums are low growing, of spreading or creeping nature, and are used largely in rock gardens, and for covering loosely built walls for terraces, etc.

Achillea Tomentosum Golden flower heads, on fine wooly foliaged plant. 6 inches.

Acre Brilliant green, yellow flowers, mossy growth.

Album White flowers, thick waxy foliage.

Hardy Cactus Large lobed rich green cactus. Large waxy cup-shaped flowers in June.

Kamtschaticum Deep green foliage, 6 inches tall, spreads at root, does not trail; golden blossoms.

Kamtschaticum Variegated. Dull green with yellow, reddish-orange flowers, 6 in. stem.

Lydium Glaucum A very fine gray-green foliage.

Pruniatum Forsterianum Bluish-green rosettes, yellow flowers on 6 inch stem.

Sarmentosum Yellowish-green foliage, bright green throughout the winter. Rapid vine-like growth with yellow blossoms.

Sempervivum Tectorum Commonly called "Hen and Chicks", red blossoms on 12 inch stems.

Sexangulare Yellow flowers on tri-angular forks, mossy foliage.

Spathulatum Reddish bronze leaves. Dark yellow flowers; harmonizing beautifully with plant.

Spurium Album White blossoms, trailing nature, light green foliage, spreads rapidly.

Spurium Coccineum Pink flowers, deep red foliage, blooms in late summer; 6 inch stems; trailing habit, spreads rapidly.

Price: 10c and up, according to size of clump wanted.

TRITOMA - Red Hot Poker

Pfitzer's Tritoma Flower heads of rich orange-scarlet 3 to 4 feet tall; blooms during August and September.

..... 35c

THE LIBIS GARDENS - Akron, Ohio

VIOLET (Sweet)

Prince of Wales	Rich deep purple. Good forcing variety.	25c
-----------------	---	-----

ROSES

The best, grade No. 1, two year, well rooted plants.

HYBRID TEA ROSES

Betty Uprichard	Salmon pink, exterior shaded carmine.	55c
Briar Cliff	True Rose-pink.	55c
Caledonia	White, large, fully double.	60c
Columbia	True rose-pink.	55c

Dr. Van Fleet	Large double flesh pink.	50c
Mary Wallace	Semi-double pure rose-pink.	50c
New Dawn	(U.S. Plant Patent No. 1) everblooming flesh pink.	\$1.50
Paul's Scarlet Climber	Scarlet red.	50c
Silver Moon	Pure white.	50c

BULB AND PLANT TREATMENT

The best general treatment of gladiolus bulbs disease cure and prevention is the treatment with Murcuric Chloride (Corrosive Sublimate) solution. This treatment will kill thrips and thrip eggs, as well as the spores of fungous diseases. Soak the bulbs at least 7 hours (or over night) in the solution, 1 oz. to 7½ gallons of water, preferably not under 60 degrees. Wet treatment should not be done till planting time. The bulbs may be planted wet.

For spraying the growing stock for thrips or other insects, we recommend ROTO-TOX. This is both a stomach and contact poison—non-poisonous to people or animals—a complete spray requiring only dilution with water.
